

# Team Sirius Cybernetics

## Team Members

Anthony Diorio  
Shane Gacke  
Milad Alaeian (Week 3 Leader)  
Mattias Duffy

## Accomplishments/Activities/Meetings

- Developed plan for creating a testing environment for our project.
  - Started building the environment on our various machines.
- Gathered information about machine learning and GANs.
- Started to take a look at baseline models for our own project.
- Met with Lockheed Martin and discussed current progress, potential workshop, and future plans.

## Issues

- Development and creation of the baseline models for each half of the GAN must be done ASAP.

## Open Action Items

- Create baseline for next week. This is expected to be a collaborative process.

## Plans for next week

- Finalize testing environment with Azure.
- Create and begin testing a baseline model in our testing environment.
